COMET MP-80 multipurpose Blast Pot :

- It is based on the Comet CUP Blast machine - Constant under pressure.
- Does not damage the surface
(removes the printing on packet of cigarettes without damaging the paper).
- Lesswear and tear and parts are inexpensive.
- It is essential to use cooled and dry air (an after cooler is highly recommended.)

MP-80

80 Ltr Capacity

- Blast with abrasive and/or clean air to clean work surface or clean out blasthose
- Only decompresses when refilling the blastpot

MP-80 Blast Machines Strahlgeräte Sableuses

MP-80 80 Ltr Capacity

- Below you will see UDV-P Gritvalve
- All abrasieve can be used.
- Ideally suited for very fine abrasieve such as garnet, olivine, korund and sodium bicarbonate (baking powder), fine glass beads at very low pressure.
- Cheap replacement parts

- Low consumption of abrasives, low air consumption, low fuel consumption, produces less CO2
- This deadmanhandle is a pneumatic remote control for blast machines with a fast reaction time. The double line air system offers a high security standard and still changing the valve is very easy and fast. Our interlock option reduces fatigue of the operators, but also considers safety standards with the included fall protection.
- This Deadmanhandle has safety cable

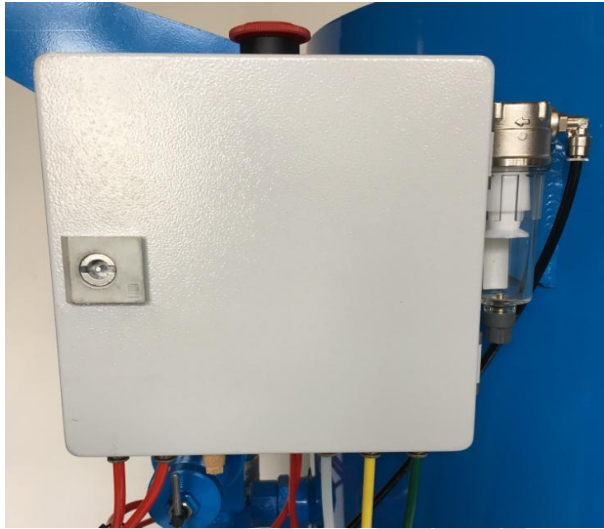

- And Black switch for gritvalve OPEN or CLOSED. By operator himself
